Industrial Services

Bilfinger Berger Industrial Services provides a wide range of services with a focus on the process industry and energy sector. These services comprise the entire life cycle of industrial plants and include individual trades, engineering, piping engineering and the assembly of machinery and equipment as well as comprehensive maintenance concepts and complex major projects. The company has been a part of the Bilfinger Berger Multi Service Group since 2002 and has numerous operating companies throughout Europe and in North America.

We're looking for graduates from disciplines including

- > Engineering with a focus on service engineering and process engineering
- Electrical engineering
- Mechanical engineering in general
- Mechatronics
- Chemistry
- > Industrial engineering specializing in electrical engineering
- > Industrial engineering specializing in mechanical engineering
- > Economics

Power Services

Bilfinger Berger Power Services is one of the leading service providers for the energy-producing industry. Our core business concentrates on steam generators, piping systems, energy and environmental technology and mechanical engineering and apparatus assembly. Ten key companies have bundled their strengths with the following goals: to secure the energy supply now and in the future, to use resources economically and to protect the environment. With its 7,000 experienced employees, the company successfully implements pioneering technologies in power plants – for lower primary energy consumption and less CO₂ emissions.

We're looking for graduates from disciplines including

- > Engineering:
Power engineering, construction technology,
process engineering, mechanical engineering,
environmental technology
- > Physics
- > Industrial engineering
- > Economics

Building

Bilfinger Berger Building provides a comprehensive range of services and carries out the construction of office and administration buildings, hotels, shopping centers, schools, hospitals, residential real estate and nursing homes. Our core competencies range from development, design and turnkey construction to revitalization and optimization. We take a holistic approach and consider the entire lifecycle of any real estate property – for optimal decisions and sustainable solutions. For example: the new Regionshaus building in Hanover, awarded the German seal of approval for sustainable construction in gold.

We're looking for graduates from disciplines including

- > Civil engineering with a focus on construction management and technical building equipment
- > Industrial engineering with a specialization in construction
- > Economics
- > Architecture

Nigeria

For 45 years Bilfinger Berger Nigeria has provided its Nigerian affiliate Julius Berger Nigeria engineering services, the support of specialist staff as well as technical and commercial know-how in the execution of major projects in the areas of engineering, building construction and underground engineering, all from its location in Germany. During local construction, we take on comprehensive services as well as the maintenance of machine technology equipment and the vehicle fleet with our 400 employees in Wiesbaden as well as employees who have been sent to Nigeria.

We're looking for graduates from disciplines including

- › Civil engineering with a focus on construction management and technical building equipment, surveying, structural, civil, foundation and road engineering
- › Mechanical engineering, in the field of construction machinery and automotive engineering
- › industrial engineering specializing in mechanical engineering
- › Architecture
- › Electrical engineering
- › Supply engineering
- › Business administration

Civil

Bilfinger Berger Civil is one of the recognized providers of major infrastructure projects in Germany and abroad. With sound advice, leading technologies and innovations as well as the necessary cultural and social competence, we support both our customers and partners in the successful materialization of their projects and visions. For this purpose our employees are active in many locations throughout the world, with a focus on the European market. With our highly specialized technologies in road construction, bridge building, tunneling, foundation engineering, hydraulic engineering and steel construction, we can develop the best solutions for our customers at any time, interdisciplinary and from a single source.

We're looking for graduates from disciplines including

- > Civil engineering, with a particular focus on construction management, construction engineering, underground engineering, road construction and hydraulic engineering
- > Industrial engineering, in particular with a specialization in construction
- > Economics

Project Investments

Bilfinger Berger Project investments is the specialist for PPP projects (public-private partnerships) within the Bilfinger Berger Group. Now active in three continents, we execute many successful projects in the areas of transportation, health, education, correctional facilities and rescue services. And we always hold ourselves to our aspiration to deliver first-class services and quality. We have invested approx. 400 million of equity in PPP projects around the world and thereby manage public infrastructure with a total value of about 8 billion. 140 employees currently share in this success in their offices in Australia, Canada, Great Britain, Luxembourg and Wiesbaden, Germany.

We're looking for graduates from disciplines including

- > Economics
- > Civil engineering (particularly project financing)
- > Asset management
- > Industrial engineering
- > Construction management
