

DOSING AND MIXING TECHNOLOGIES

DOSING & MIXING TECHNOLOGIES

PORTFOLIO

Bilfinger Engineering & Maintenance designs, manufactures and delivers under the brand name dmt complete process systems from engineering support to operation and training of the customer's staff.

Overview of our services

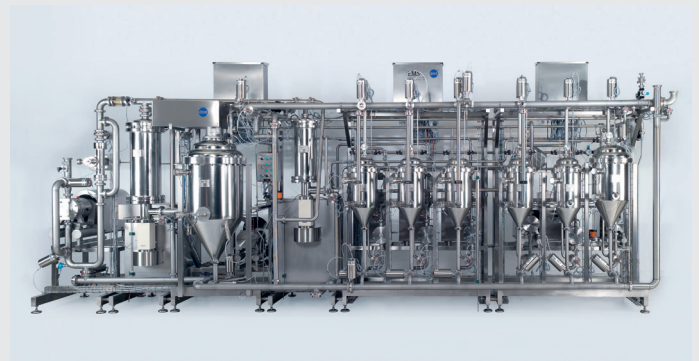

Our dosing- and mixing technology products

- Dosing units
- Dosing pumps
- Methanol and glycol dosing pumps
- Odorizing units
- Dynamic loop mixer
- Static loop mixer

Our dosing and mixing units are mainly produced for the gas industry, chemical industry, food and beverage industry.

For the development of new process technology solutions Bilfinger Engineering & Maintenance GmbH provides dosing units for operational trials to the customer.

After a successful testing, a reliable scale-up on the planned production facility by the customer will be implemented. Bilfinger Engineering & Maintenance GmbH offers complete mixing and dosing systems for various customer-applications.

From planning, design, production, delivery, installation, commissioning, personnel training to after-sales service, Bilfinger Engineering & Maintenance GmbH offers the entire portfolio of plant engineering.

OUR COMPETENCE - YOUR ADVANTAGE

- Optimize and save costs - through solutions from a single source
- Specialized personnel highly qualified and trained
- First-class occupational safety performance
