# Hoisting Technology

Specialized in manufacturer-independent lifting equipment service

We perform professional testing, repair, project planning, as well as upgrades and retrofitting of hoisting equipment, crane installations, rigging gear, and power-operated gates.

## Our Services

Crane and lifting equipment inspections are reliably carried out by us in accordance with §25 (expert inspection) and §26 (competent person inspection).

- DGUV Inspections
- Bridge, gantry, and slewing cranes
- Winches, hoisting and pulling devices
- Manual and power-operated lifting equipment
- Manual floor conveyors (pallet trucks)
- Lifting platforms, vacuum lifters, lift tables
- PPE, safety harnesses, lifting accessories
- Statutory safety inspection of load handling attachments
- Statutory safety inspection of racking systems
- Statutory safety inspection of power-operated doors, gates, and windows
- Statutory safety inspection of ladders, step stools, and fixed ladders
- Calculation of remaining service life for power-operated hoisting mechanisms upon request in accordance with §35 DGUV 54
- Inspection of electrically operated lifting equipment according to DGUV V3

## Additional Lifting Equipment Services

- Spare parts procurement
- All types of repairs for lifting equipment and cranes
- Procurement and repair of power-operated doors/gates
- Planning, procurement, modifications / new installations
- Modernization and expansion of crane systems
- Reminders/notifications for annual inspections
