## Press Release

February 2, 2016

### **Bilfinger wins new services contract for all Airbus locations in Southern Germany**

The engineering and services group Bilfinger is assuming responsibility for technical facility management for seven locations of the Airbus Group in Southern Germany. The contract has an initial term of five years and total volume in the mid double-digit million range. It covers the locations in Ottobrunn, Manching, Augsburg, Ulm, Friedrichshafen, Lampoldshausen and Donauwörth.

The decisive factor for the contract award was a centrally-managed service concept which guarantees short reaction times for the provision of local services. Airbus is placing increased emphasis on uniform facility management with a high degree of transparency for the provision of services and sees Bilfinger as a strategic partner for the future.

Bilfinger is the market leader in Germany for real-estate services and is also well-positioned in other European countries. In financial year 2015, output volume in this business segment will increase significantly, reaching a magnitude of a good €2.8 billion.
