## Press Release

April 11, 2017

### **Bilfinger mandated in modernization program for French nuclear power plants – new contract with Electricité de France**

Bilfinger has received an important framework contract from energy company Electricité de France (EDF) for the modernization of 58 French reactor blocks. The order is awarded to a consortium including three Bilfinger companies of the segment Engineering & Technologies. It covers engineering and construction services and has a total output volume for Bilfinger of up to €40 million over the course of the next five years.

“The EDF contract is a great achievement for us and is confirmation of our new strategy. We are bundling our strengths to provide our customers with a superior value proposition and support our profitable growth. In this case we combine engineering services with our piping competencies creating decisive added value for our customer”, says Bilfinger CEO Tom Blades.

France is one of the largest economies in Europe. Bilfinger has a long established tradition in the design, fabrication and delivery of discrete process components – commonly known as packaged units – in the French gas processing, biotech / pharmaceutical and petrochemical industries. In recent years, existing customer relationships have been developed further and additional customers in other industries have been won. Bilfinger will continue to build further on the resulting growth momentum. One of the additional focus industries will be energy & utilities.

Bilfinger is a leading international industrial services provider. The Group enhances the efficiency of assets, ensures a high level of availability and reduces maintenance costs. The portfolio covers the entire value chain from consulting, engineering, manufacturing, assembly, maintenance, plant expansion as well as turnarounds and also includes environmental technologies and digital applications.

The company delivers its services in two business segments: Engineering & Technologies as well as Maintenance, Modifications & Operations. Bilfinger is primarily active in the regions Continental Europe, Northwest Europe, North America and the Middle East. Process industry customers come from sectors that include chemicals & petrochem, energy & utilities, oil & gas, pharma & biopharma, metallurgy and cement. With its 37,000 employees, Bilfinger upholds the highest standards of safety and quality and generates an annual output volume of about €4 billion.
