Bilfinger supports leading healthcare company with Corona vaccine production

- **Deployment of skilled personnel, ensuring on-time project execution**
- **Expansion of ongoing successful collaboration with customer**
- **30 to 40 Bilfinger employees on site**

Bilfinger has supported one of the world's largest biomedical companies with modifications of one of their plants for the industrial production of a Corona virus vaccine. The contract marks an extension and an expansion of an existing framework agreement with the customer.

"We are honored to support a long-standing customer in the fight against COVID-19 with our expertise in designing and modifying biopharma plants," says Christina Johansson, interim CEO and CFO at Bilfinger. "Our experience in the industry and customer-specific knowledge were key factors in winning this contract. Being already onsite, we could rapidly provide the personnel, proficiency and flexibility required for this time-critical project."

A team from Bilfinger Tebodin, with up to 40 employees on site and up to 60 in the back office, has been supporting the customer with various smaller modification projects at their pharmaceutical production plant for the past six years. At the beginning of 2021, the framework agreement was extended for another year. During the plant modification stage, the Bilfinger team also took over some additional non-vaccine related projects, allowing the customer to focus on getting the vaccine production up and running.

With an experienced team involved in pharmaceutical and biotech projects, the multidisciplinary consulting and engineering firm [Bilfinger Tebodin](#) executes projects for the European (bio-)pharmaceutical industry.

The Austria-based subsidiary [Bilfinger Industrietechnik Salzburg GmbH](#) also supported another well-known pharmaceutical company in the modification of their plants for the [industrial production of a Corona virus vaccine](#).

Corona vaccines are making a vital contribution to the fight against the COVID-19 pandemic (source: [WHO](#)). To contain the pandemic and to ensure people have individual protection from the virus, it is necessary to produce and administer billions of doses of vaccine in a short period of time. Bilfinger has now supported two customers with the modification of their plants to help make this possible.

Bilfinger is a leading international industrial services provider. The Group enhances the efficiency of assets, ensures a high level of availability and reduces maintenance costs. The portfolio covers the entire value chain from consulting, engineering, manufacturing, assembly, maintenance and plant expansion to turnarounds and also includes environmental technologies and digital applications.

The company delivers its services in two service lines: Engineering & Maintenance and Technologies. Bilfinger is primarily active in Europe, North America and the Middle East. Process industry customers come from sectors that include chemicals & petrochemicals, energy & utilities, oil & gas, pharma & biopharma, metallurgy and cement. With its ~ 30,000 employees, Bilfinger upholds the highest standards of safety and quality and generated revenue of €3.5 billion in financial year 2020.
