## Ongoing positive development

### Markets and highlights

- Key figures affected by deconsolidation of Nigerian activities, positive underlying performance
- Organic development: +4% in output volume, +7% in EBITA
- Building: New projects with total volume of €50 million
- Facility: Increasing demand for multi-national service offerings
- Water Technologies: Important markets North America and Eastern Europe continue to show positive demand

### Outlook 2013

- Output volume and earnings are affected by deconsolidation of Nigerian business. Nonetheless, output volume will slightly increase to almost €2.3 billion as a result of acquisitions made so far
- Proportionate earnings of Julius Berger Nigeria Plc (at-equity) are no longer presented in this business segment, but under “Consolidation, other”
- In total, EBITA margin at least at prior year level

# Construction

## Positive EBITA planned for the full year

### Markets and highlights

- Negative EBITA despite positive contribution from most Construction units
- Divestment of loss-making German road construction business:  
To be completed in Q4 2013  
Loss from operations Jan. to Sept. 2013: €15 million  
Annual output volume: Approx. €100 million in prior years, strongly reduced to €25 million in 2013 because of planned discontinuation
- Realignment of Polish infrastructure unit with a focus on a broader client base. In view of the favorably developing order backlog, we anticipate a positive development in 2014

### Outlook 2013

- Output volume will decrease significantly to just under €1.1 billion
- The loss posted by road construction in Germany and this year's breakeven of Polish infrastructure unit will lead to a drop in EBITA margin to about 1 percent, despite good margins in other Construction units

# Discontinued operations: Concessions

- Negotiations with Bilfinger Berger Global Infrastructure Fund regarding sale of Concessions projects are at an advanced stage

- Including the already reported sale of two Canadian projects we expect the following result:

Sales proceeds: approx. €270 million

Expected capital gain: more than €50 million

One-off costs (sale and winding-up): more than €10 million

Completion is expected to take place in Q4 2013 and in 2014

- Currently retained projects: M6 Duna and M6 Tolna Motorway (both Hungary), A1 Motorway (Germany)  
Due to the development of traffic volumes A1 is under review

## Committed equity by region

# Outlook for FY 2013 detailed

- Our earnings forecast relates to adjusted EBITA and adjusted net profit from continuing operations. This serves to enable comparability over time
- Despite the significant reduction in Construction and the effect of the deconsolidation of the Nigerian business, we anticipate a stable output volume of close to €8.6 billion for FY 2013, also based on acquisitions that have already taken place
- Adjusted EBITA will rise to approx. €400 million (FY 2012: €378 million)
- Adjusted net profit from continuing operations will increase to more than €240 million (FY 2012: €231 million)
