Directors' valuation of Concessions portfolio

General

- The DCF method of valuation is generally used
- Only projects where "financial close" has taken effect are included
- Cash flows serving as the basis are derived from financial models approved by external lenders
- Future potential refinancing gains are not taken into account in the valuation
- Valuation is based on specific discount rates between 8% and 12% considering different risk profiles. Weighted average discount rate as at December 31, 2008 was 10.5%. (December 31, 2007: 10.1%)

Specific discount rates

- Weighted risk-free basic interest rate is derived from country specific long-term treasury bonds (currently 6 %)
- Premium on basic interest rate for project type adjustments
 - 2% for projects where revenues depend exclusively on the degree of availability (e.g. schools)
 - 3% for projects, that entail limited volume risks
- Further premium on basic interest rate for project phase adjustments
 - 3% in the construction phase
 - 2% in the ramp-up phase
 - 0% in the operation phase, when revenues and costs are certain
