

AGGREGATE POOL

ALL-IN-ONE SOLUTION FOR THE RENTAL OF
PUMPS / E-MOTORS / CONVERTERS / ACTUATORS

Customers select among a broad range of models from renowned manufacturers, regardless of whether it is production equipment or just a back-up device, whether a rapid replacement time is needed for the equipment or whether an on-site reserve is required.

Our range of rental equipment includes:

- Manufacturer-independent consulting and design of the appropriate pump technology with an eye to customer requirements and lifecycle costs
- Optimization of existing and/or new installations over the course of the rental period
- Equipment and spare parts management (investment, procurement and provision)
- Equipment in conformity with relevant standards and regulations (MRL, ATEX, TA-Luft, Pressure devices-RL, BetrSichV, etc.)
- Provision of replacement equipment around the clock in line with contractually agreed reaction times

Advantages:

- Aggregate pool in modular tool-box system for pumps, motors and frequency converters means a reduced range of spare parts
- Immediate availability of equipment documentation through central administration of the equipment catalogue
- Free application consulting for technical and process relevant questions during the rental period
- Flexible exchange of equipment in the case of optimizations or plant adaptations

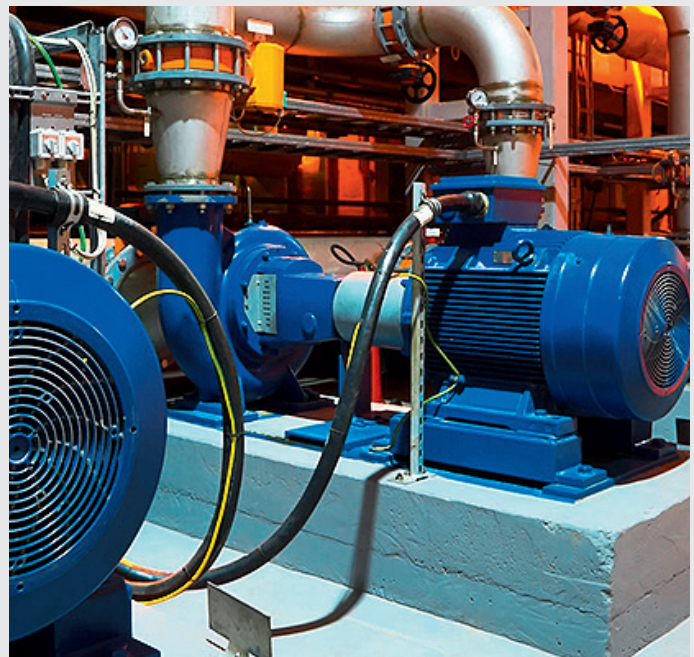

Value Performance Contract (VPC)

In addition to equipment rental, maintenance services can also be integrated into a Value Performance Contract (VPC) with a fixed annual budget and relevant key figures. The customer is thus contractually guaranteed an expanded availability promise.

Engineering & Maintenance

Continental Europe

Bilfinger Maintenance GmbH
Machinery and drive equipment
Industriepark Höchst, Building C619, 65926 Frankfurt am Main
www.bm.bilfinger.com

Benefits for the customer:

- Increase in plant availability through quick replacement via pool reserve equipment
- No capital employed for equipment or spare parts
- Process security through flexible adaptation to changed operating conditions
