

WE MAKE PERMITS WORK

Six steps to working safely with a work permit. We can only work safely when all of the steps have been completed.

Bilfinger SE, C/HS; 12/2018

VERIFY! WE MAKE PERMITS WORK

The team leader and employees ensure that all control measures have been fully implemented and are effective throughout the job.

RE-ASSESS! WE MAKE PERMITS WORK

Interruptions in work, changes in the work situation and unexpected events mean that a new risk assessment must be carried out and control measures need to be adjusted where necessary.

SAFETYWORKS! WE MAKE PERMITS WORK

Six steps to working safely with a work permit.

THAT'S WHAT WE STAND FOR!

GENERATE! WE MAKE PERMITS WORK

The work to be executed and all of the risks are discussed on-site with the customer. Control measures required to ensure safe execution of the job are defined.

ACCEPT! WE MAKE PERMITS WORK

All relevant information and specific requirements are documented in the work permit. This includes the time, place and type of work to be performed, all persons involved and control measures required. The team leader receives the work permit.

IDENTIFY! WE MAKE PERMITS WORK

The issuer of the work permit shows the team leader and employees the exact work area where the work is to be executed on-site.

PREPARE! WE MAKE PERMITS WORK

The control measures are implemented and complied with before, during and after the work. This happens on-site in active dialogue with the issuer of the work permit.
